5 YEARS

PROJECT WORK

Bukid Markets | Developer | [Code URL](#) | [Live URL](#)

2022

A Ruby on Rails application that allows farmers to list and sell their produce.

- Used Google OAuth to let users log in using Google authentication.
- Used Devise Token Authentication for sign-in and sign-up.
- Utilized Action Text to enable users to use a rich text editor when updating product descriptions.
- Allowed users to create, manage, and delete a product.

Stocks Trading App | Developer | [Code URL](#) | [Live URL](#)

2022

A Ruby on Rails application that allows users to trade stocks using IEX API.

- Implemented Admin Dashboard to assess pending traders that need approval and can reject traders.
- Built a feature where users can search for a specific company and display its stock details.
- Utilized SASS/SCSS to design the front end for a more organized CSS code.
- Used Devise Token Authentication for sign-in and sign-up.

Slack Clone App | Developer | [Code URL](#) | [Live URL](#)

2022

A ReactJS application where users can directly message and create channels to connect to other users.

- Utilized the Slack API in order for users to send and receive messages in real time.
- Built a feature that actively shows users' emails based on the searched keyword.
- Utilized SASS/SCSS to design the website faster and more organized.
- Made a feature that shows the list of channels of the users.
