OBJECTIVE: *To join a company that offers a stable and positive atmosphere with my knowledge of developing and maintaining features for web applications while having opportunities for career growth and professional challenges.*

SKILLS

Front-End: Next.js, React.js, JavaScript, TypeScript, TailwindCSS, HTML, CSS, Redux, HeadlessUI, Sass

Back-End: Node.js, Express, AWS, PostgreSQL

Version-Control: Git, GitHub, BitBucket

Code-Editor: Visual Studio Code, Cursor

DevOps Tools: Vercel, Netlify, Heroku, GitHub Pages, Render

CMS & E-commerce: WordPress, Shopify, Squarespace, Wix

Exposure: Canva, Markdown, JSON, YAML, HAML, Insomnia, Postman, Figma

Soft skills: Adaptable, Teamwork, Detail Oriented, Time Management, Decision Making, Pressure Handling

EXPERIENCE

Self-Employed as TOP RATED on UPWORK | Front-end Developer | Remote

Technologies offered: MERN, Next.js, TypeScript, TailwindCSS, Redux

Oct 2023 -
Present

METICULY | Front-End Developer | Bangkok, Thailand | Remote

Technologies: React.js, TailwindCSS, AWS Amplify Studio, Figma

February 2024
- May 2024

- Integrated AWS Amplify Studio to expedite the development process, enabling quick setup of backend services, authentication, and data management features, which streamlined the overall workflow and improved productivity.
- Led the development of the admin website for a medical app, focusing on creating intuitive and efficient interfaces for managing data. This involved the use of React.js for building dynamic user interfaces.
- Utilized TailwindCSS to style the admin pages, ensuring a consistent and responsive design across various devices and screen sizes. This approach not only improved aesthetics but also enhanced user interaction and accessibility.
- Implemented comprehensive Create, Read, Update, Delete (CRUD) functionalities to manage user data effectively, facilitating smooth operations within the medical app's ecosystem.

YOPRINT | Front-End Developer | Claymont, United States | Remote

Technologies: Next.js, TailwindCSS, TypeScript, MDX, HeadlessUI, Figma

Oct 2023 -
February 2024

- Spearheaded the development of the company's main website using Next.js, ensuring a robust, scalable, and responsive design. Integrated TailwindCSS for efficient styling, enhancing user experience with a modern, clean aesthetic.
- Utilized TypeScript to ensure type safety and improve the maintainability and scalability of the website's codebase, reducing bugs and enhancing developer productivity.
- Developed a dedicated customer support page to enhance user engagement and provide comprehensive support solutions. This included integrating interactive FAQs, support ticket submissions, and contact forms.

- Focused on front-end performance optimizations to decrease load times and improve the overall user experience. Employed modern development best practices and tools to achieve optimal performance scores.

OCTIFY TECHNOLOGIES | Full-Stack Developer | Haryana, India | Remote

June 2023 -
Oct 2023

Technologies: Next.js, TailwindCSS, TypeScript, AWS, Redux, Node.js, Express, Figma

- Developed dynamic and responsive front-end interfaces utilizing Next.js, creating seamless user experiences and improving overall performance.
- Implemented back-end functionality with Node.js to ensure data processing, server-side logic, and database interactions were efficiently handled.
- Leveraged TypeScript to enhance code quality, maintainability, and overall development productivity, ensuring a smoother development process.
- Practiced Agile methodologies to collaborate with cross-functional teams, effectively communicate project status, and deliver iterative results that aligned with client requirements and expectations.
- Demonstrated a commitment to high-quality code by adhering to Test-Driven Development (TDD) principles, writing comprehensive unit and integration tests, and ensuring application stability and reliability.

WOOP SCHOLARSHIP | Software Developer | Pagadian City, Philippines | Hybrid

Dec 2022 -
June 2023

Technologies: NextJS, TailwindCSS, TypeScript, AWS, Redux, Node.js, Express, Figma

- Developed and maintained a responsive and user-friendly web application using NextJS, Tailwind CSS, and TypeScript.
- Communicated with the back-end developer to ensure the consistency and accuracy of data exchange between the front-end and back-end components.
- Worked closely with UX designers to create wireframes, mockups, and prototypes for new features.
- Collaborated with the QA team to ensure quality assurance testing of the front-end components.
- Worked with the project manager to identify and prioritize features, tasks, and deadlines.

AVION SCHOOL | Full-stack Developer Trainee | Taguig City, Philippines | Remote

March 2022 -
October 2022

Technologies: React, TypeScript, Ruby on Rails, PostgreSQL, GitHub, HTML, CSS, Insomnia

- Participated in a Software Development Bootcamp where I learned and worked with HTML, CSS, JavaScript, TypeScript, ReactJS, Ruby on Rails, PostgreSQL, GitHub, Insomnia, and VSCode
- Collaborated with team members to design and develop a web application using the aforementioned tools.
- Developed and implemented back-end functionality using Ruby on Rails and PostgreSQL.
- Worked with version control systems like Git to manage code changes and collaborate with team members.
- Debugged and fixed issues in both front-end and back-end code.
