Soft skills: Adaptable, Teamwork, Detail Oriented, Time Management, Decision Making, Pressure Handling

EXPERIENCE

UPWORK | Full-Stack Developer | Top-Rated | Remote
Oct 2023 - Present
- [Upwork Account](#)

OCTIFY TECHNOLOGIES | Full-Stack Developer | Haryana, India | Remote
June 2023 - Oct 2023
- Developed dynamic and responsive front-end interfaces utilizing Next.js, creating seamless user experiences and improving overall performance.
- Implemented back-end functionality with Node.js to ensure data processing, server-side logic, and database interactions were efficiently handled.
- Leveraged TypeScript to enhance code quality, maintainability, and overall development productivity, ensuring a smoother development process.
- Practiced Agile methodologies to collaborate with cross-functional teams, effectively communicate project status, and deliver iterative results that aligned with client requirements and expectations.
- Demonstrated a commitment to high-quality code by adhering to Test-Driven Development (TDD) principles, writing comprehensive unit and integration tests, and ensuring application stability and reliability.

WOOP SCHOLARSHIP | Software Developer | Pagadian City, Philippines | Hybrid
Dec 2022 - June 2023
- Developed and maintained a responsive and user-friendly web application using NextJS, Tailwind CSS, and TypeScript.
- Communicated with the back-end developer to ensure the consistency and accuracy of data exchange between the front-end and back-end components.
- Worked closely with UX designers to create wireframes, mockups, and prototypes for new features.
- Collaborated with the QA team to ensure quality assurance testing of the front-end components.
- Worked with the project manager to identify and prioritize features, tasks, and deadlines.

AVION SCHOOL | Full-stack Developer Trainee | Taguig City, Philippines | Remote   March 2022 - October 2022

- Participated in a Software Development Bootcamp where I learned and worked with HTML, CSS, JavaScript, TypeScript, ReactJS, Ruby on Rails, PostgreSQL, GitHub, Insomnia, and VSCode
- Collaborated with team members to design and develop a web application using the aforementioned tools.
- Developed and implemented back-end functionality using Ruby on Rails and PostgreSQL.
- Worked with version control systems like Git to manage code changes and collaborate with team members.
- Debugged and fixed issues in both front-end and back-end code.

RUSTAN SUPERCENTERS INC. | Assistant Electrician | Cebu City, Philippines | Remote   April 2018 - June 2018

- Responsible for overseeing the temperature of more than 30 refrigerators and coolers, ensuring that the products inside are maintained at recommended values to preserve freshness and minimize waste.
- Conducted inspections on over 100 appliances to verify their functionality, promptly scheduling repairs if any issues are identified.
- Assisted senior electricians in installing, repairing, and maintaining electrical systems in our commercial building.
- Followed safety protocols and guidelines to ensure a safe working environment for myself and my colleagues.
